

CHIPCO Product Warranty Details

CHIPCO International manufactures casino quality gaming chips for use at gaming operations around the world. Our manufacturing process uses composite resins and a proprietary printing process to decorate the custom images on the face and edge of the chips. This manufacturing process produces a durable embedded graphic image into the chip surface. Our process allows us to produce both visible and invisible images on both the face and edge surfaces.

CHIPCO has produced over 100 million units using this manufacturing process, and supplied gaming operations all over the world for the last 21 years. This proven track record allows us to offer every client the following product guarantee:

1. CHIPCO warrants our gaming chip products for 2 years against any manufacturing defect.
2. CHIPCO's gaming products are fully washable using conventional cleaning methods of hot water and cleaning liquids.
3. CHIPCO's graphic images will not fade from normal gaming operational usage.
4. CHIPCO gaming chips have been used successfully in Roulette Chipper machines sorting by color on the rim face surface.
5. CHIPCO warrants that our gaming chip products are suitable for use in traditional gaming applications.

CHIPCO is committed to providing each client with superior products and stands behind our quality with a full NO COST REPLACEMENT guarantee as detailed above.
