

# TRANSACT

Technologies Incorporated

November 22, 2005

**Subject:** RoHS Compliance

**Customer part Number:**

**Description:** All Ithaca product lines currently in production, with the following exceptions: M750 / M850 / M860 / M90 / PJ1500

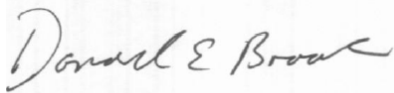

TransAct Technologies is in the process of documenting and revising our designs as required for compliance with EU directive 2002/95/EC (RoHS).

We have contacted our suppliers and have requested that they provide their current compliance status by 4/1/2005.

We plan to work with our suppliers to bring non compliant parts into compliance and have established a deadline of 2/1/2006 for sample availability. Depending on the extent of the changes required, we may choose to perform additional qualification testing and plan to have full production available by 6/1/2006.

Please feel free to contact me directly with any additional questions.

Sincerely,

Donald E. Brooks
